

Proven fuel economy benefit!

BG HD Engine & Fuel System Performance Restoration Service

Features

- Validated by independent testing facility – Mesilla Valley Transportation Solutions (MVTs) – with results of 1.31% to 2.11% fuel economy restoration on Class 8 test trucks
- Performed during the oil change process at current fleet drain intervals
- Removes fuel and oil deposits throughout the entire fuel system, including injectors and combustion chamber

Benefits

- Proven to restore fuel economy
- Restores compression
- Reduces blow-by and oil consumption
- Prolongs component life of fuel system, powertrain, and after-treatment devices
